INTRODUCTION

This survey provides a definitive record of existing conditions of all interior spaces of the powerhouse on Ellis Island as of October 1984. In addition, each space has been evaluated for architectural significance. The survey has been used to assist in the preparation of the Historic Structure Report. Observations recorded in this study will also help to identify appropriate design parameters for alternative space utilization proposals.

The results of the survey have been plotted on graphically-coded floor plans that illustrate the relative condition and architectural significance of each space.

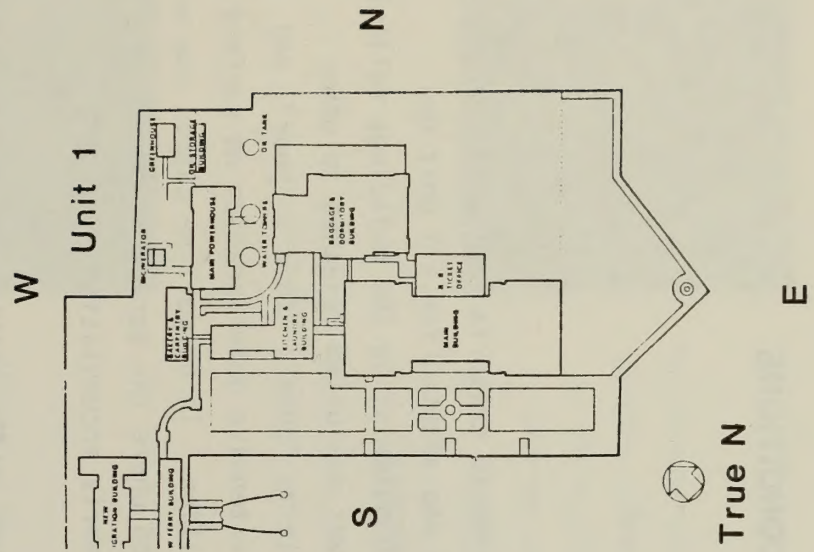

EXPLANATION OF FORMS

This interior architectural survey of Unit One buildings consists of a room-by-room analysis of all visually accessible finishes, decorative trim, doors, lighting, plumbing, and heating equipment. Nearly 200 survey forms were completed at the site. On these, the room number, last known use, square footage, ceiling height, and date of survey are recorded. The surface materials in each space are described and assessed for their existing condition and approximate date. A summary condition and date has been tabulated based on this information. In cases where sizable portions of the room are from different periods, more than one date has been given. Rooms are also evaluated for relative architectural significance within the building. Photographs of each room supplement the written description; however, in some instances photographic coverage was limited due to the accumulation of debris.

Room numbers were assigned by the surveyor in a roughly clockwise order and do not represent any historical numbering systems.

The definition of square footage used for calculations was the area of each room measured from the inside edge of the exterior and/or principal walls in each space, including both structural and non-structural interior walls.

Survey forms for each building are in numerical sequence for each floor and are followed by forms for the hallways (numbers preceded by an "H"). Forms for all interior stairs (numbers preceded by an "S") are located in the last section for each building.

DEFINITIONS OF EXISTING CONDITIONS

The condition of each space has been evaluated according to criteria that were specifically developed for the main building on Ellis Island and adapted for all Unit One buildings. A range of conditions was defined for each material in the buildings following careful field inspection. The condition of a finish was evaluated relative to other similar finishes in all buildings using the standard terms "good", "fair", "poor", and "destroyed". Since these buildings have experienced extensive deterioration no surfaces or fixtures were considered to be in "excellent" condition. In borderline cases, the more deteriorated condition was selected. It has been noted where the survey of a room or parts of a room was made difficult or impossible by debris accumulation.

Following are definitions of the criteria that were used in the existing condition survey of Unit One buildings. Items are discussed in the order that they appear on the forms.

FLOOR Tile

GOOD

85-100% intact.
Very few, if any,
cracks in tile.
Minor discoloration.
Retiling noticeable in
places.

FAIR

60-85% intact.
Some cracks in
localized areas.
Some tiles missing.

POOR

30-60% intact.
Large cracks. Large
areas missing.

DESTROYED

0-30% intact.
Material is completely
missing or is destroyed beyond
practical retrieval.

FLOOR Vinyl

6

GOOD

85-100% intact.

Squares in place, adhered to floor, not broken.

FAIR

60-85% intact.

Some squares broken, some buckling, some adhesive failure. Sections of wood floor exposed.

POOR

30-60% intact.

Significant number of squares are missing, broken, buckling, loose, no longer adhered.

DESTROYED

0-30% intact.

Material is completely missing or is destroyed beyond practical retrieval.

FLOOR
Linoleum

GOOD

85-100% intact.
Little or no cracking or buckling. No material missing.

FAIR

60-85% intact.
Some material missing. Cracked into sections. Some buckling.

POOR

30-60% intact.
Significant amount of material missing. Extensive cracking, buckling, and spalling of material.

DESTROYED

0-30% intact.
Material is completely missing or is destroyed beyond practical retrieval.

BASE Wood

GOOD

90-100% intact.
Still joined to
wall. Minor
deterioration of
paint surface.

FAIR

75-90% intact.
Separated from wall
in limited areas.
Some deterioration
in localized areas
(generally along
window).

POOR

20-75% intact.
Complete separation
from wall. Serious
deterioration
(generally under
windows).

DESTROYED

Material is com-
pletely missing or
is destroyed beyond
practical retrieval.

BASE
Tile / Tile Wainscot

GOOD

85-100% intact.
Few or no cracks forming. Minimum number of tiles missing.

FAIR

60-85% intact.
Some cracks in localized areas.
Some tiles missing.

POOR

30-60% intact.
Large areas missing, sizable cracks present.

DESTROYED

0-30% intact.
Material is completely missing or is destroyed beyond practical retrieval.

WALLS & CEILINGS

Plaster

GOOD

70-100% intact.
Minor surface
spalling, cracking
and peeling of
paint.

FAIR

50-70% intact.
Substantial surface
spalling, cracking
and peeling of
paint. Unit masonry
and/or basecoat
exposed in certain
areas.

POOR

20-50% intact.
Majority of plaster
is severely cracked
with buckling and
spalling. Exposure
of significant areas
of base surface.

DESTROYED

0-20% intact.
Material is com-
pletely missing or
is destroyed beyond
practical retrieval.

Glazed Wood Partitions /
Gypsum Board / Acoustic Panels

GOOD

85-100% intact.
Minor surface damage
including scrapes,
knicks and peeling
of paint.

FAIR

50-70% intact.
Small holes and
cracks. Some
missing material.
Glass missing.

POOR

20-50% intact.
Large holes and
cracks. Major
amount of missing
material.

DESTROYED

0-20% intact.
Material is com-
pletely missing or
is destroyed beyond
practical retrieval.

DOORS / OPENINGS

Wood / Glass Panelled

GOOD

Wood, glass, and hardware intact. Minor peeling of paint. Minor surface knicks and scrapes.

FAIR

Hardware intact, part may be missing. Minor warping of doors. Deteriorated paint finish and/or surface damage.

POOR

Severe wood damage, i.e., splitting and missing elements. Glass broken or missing. Extensive deterioration.

DESTROYED

Door is missing or is destroyed beyond practical retrieval.

DOORS / OPENINGS
Wood Veneer

GOOD

Wood and hardware
intact, no splitting.

FAIR

Minor splitting
and/or delamination.
Finish and
hardware may have
minor deterioration.

POOR

Hardware missing.
Severe splitting
and/or delamination.

DESTROYED

Door is missing or
is destroyed beyond
practical retrieval.

DOORS / OPENINGS

Galvanized Metal

GOOD

Minor peeling of paint finish.
Hardware intact.

FAIR

Deteriorated paint finish. Small dents to surface. Hardware may have minor damage.

POOR

Deteriorated paint finish. Severe corrosion to surface. Bad dents. Hardware badly damaged or missing.

DESTROYED

Door is missing or is destroyed beyond practical retrieval.

LIGHTING:		Incandescent/Type A		Intact		Destroyed	
		Incandescent/Type B		Intact		Destroyed	
		Incandescent/Type C		Intact		Destroyed	
		Other:		Intact		Destroyed	

The evaluation of lighting fixtures is based on physical appearance only and does not consider whether the fixture still functions. Fixtures are considered "intact" if the shade and mount are in place. A fixture may be given an "intact" designation with or without its lamp, or bulb. A fixture is designated "destroyed" if it is damaged beyond practical retrieval or is missing.

Lighting fixture types consist of suspended glass globes, Type A, and ceiling mounted or suspended "RLM"-type incandescent fixtures, Type B. "RLM" refers to a type of flared metal enamel shade, commonly used in industrial installations. Type C consists of miscellaneous secondary fixtures used for task, safety, or exit lighting. Another light source is referred to as "CML" (ceiling mounted lamp) on survey forms. These fixtures consist of ceiling-mounted bare lamps in porcelain sockets and metal housing or lamps mounted to a ceiling conduit.

TYPE A: glass globes

TYPE B: "RLM" metal
shade fixtures

TYPE C: directional
shade and cone-shaped
counter shade

OTHER: "CML"- ceiling-
mounted lamps, with
metal housing and
conduit mount

RADIATOR: parallel pipe cluster, ceiling-suspended

FAN: wall-mounted rotary

FAN: window fan

VENT: ceiling grille to fan house

PLUMBING: porcelain rounded pedestal wall sinks (c. 1920's)

PLUMBING: free-standing metal supported sinks and water fountain

PLUMBING: slop sinks

PLUMBING: wall-mounted type urinal (c. 1940)

PLUMBING: floor-type urinal

PLUMBING: toilet

PLUMBING: shower stall with galvanized metal partitions

DEFINITIONS OF ARCHITECTURAL SIGNIFICANCE

A range of significance for spaces within the unit one buildings was developed for existing architectural spaces in the structure. The ranking of spaces for architectural significance is relative to the specific architectural context of each building. Certain factors were considered in evaluating the spaces:

- Volume, size, monumentality, proportions
- Quality of materials and workmanship
- Overall design
- Uniqueness of the design, rare features

In borderline cases, the higher level of significance was selected.

Following is a brief discussion of the criteria:

MOST ARCHITECTURAL SIGNIFICANCE

The classification of "Most Architectural Significance" was assigned to spaces that have great architectural character. Such spaces may exhibit monumental proportions and their design, materials, and workmanship are of a high quality. They are often unique volumes. An example is room 112 of the baggage and dormitory building. It is unique as the building's only central space with its large volume punctuated by five skylights.

SOME ARCHITECTURAL SIGNIFICANCE

The classification of "Some Architectural Significance" was assigned to spaces that have a moderate amount of architectural character. Volume, size, monumentality, and proportions may distinguish them from the more common and generally smaller spaces in the building. Careful attention was given to the use of materials and the execution of details. An example is room 125 of the baggage and dormitory building. The space is part of a large recreation porch with high ceiling, round cast-iron columns, window wall, and incorporates the original north exterior wall.

MINOR ARCHITECTURAL SIGNIFICANCE

The classification of "Minor Architectural Significance" was assigned to spaces that exhibit few architectural pretensions. Materials and workmanship are standard. Volume and proportions are relatively undistinguished. Rooms are common for their type. An example is room 206, a small dormitory room on the west side of the baggage and dormitory building with painted plaster walls and ceiling surfaces, tile floor and tile wainscot.

NEGLIGIBLE ARCHITECTURAL SIGNIFICANCE

The classification, "Negligible Architectural Significance" was assigned to spaces that have no architectural character. They are often very small and of standard materials and design. An example is room 226A, a small lavatory on the second floor of the baggage and dormitory building.

ROOM NO: 501 LAST KNOWN USE: STAIR TO SECOND FLOOR SQUARE FEET:

CEILING HEIGHT:

DATE: 10/3/84

Description:

General: Main stairway, located in southwest corner of building, is composed of cast iron risers and channel strings, wrought iron baluster and decorative scrolls along the stringer edges, octagonal cast iron newel post at first floor landing. Open stairwell has two equal runs from midway platform.

Floor: Slate treads, concrete platform and second floor landing. First floor landing tile of white hexagonal tile.

Walls: Painted brick.

Ceiling: Plaster over metal lath.

Lighting: One ceiling mounted bulb and one drop cord socket.

Misc.: Rounded wood handrail.

Condition:

General: All ironwork, surface corroded. Balustrade corroding at bases. All metal surfaces badly flaking paint and corroded.

Floor: Generally good. First floor landing tile cracked and floor sagged at center.

Walls: Badly flaking paint.

Ceiling: Fair. Peeling paint and plaster spalling. Exposed lath in northern corner.

Lighting: Missing shades.

Misc.: Intact, worn.

As the nation's principal conservation agency, the Department of the Interior has basic responsibilities to protect and conserve our land and water, energy and minerals, fish and wildlife, parks and recreation areas, and to ensure the wise use of all these resources. The department also has major responsibility for American Indian reservation communities and for people who live in island territories under U.S. administration.

Publication services were provided by the graphics staff of the Denver Service Center.
